# DIGITAL MARKETING SERVICES

SEO is the practice of optimizing your online content and website to rank higher in search engine results. The goal is to increase visibility and attract organic (non-paid) traffic from search engines like Google.

Social Media Marketing involves leveraging social media platforms to connect with your audience, build brand awareness, and drive engagement. It includes creating and sharing content, running ads, and engaging with followers.

PPC is an online advertising model where advertisers pay a fee each time their ad is clicked. It's a way to buy visits to your site rather than earning them organically.
